

AI based discourse for Banking Industry

Run The Application

Run the application

- Open the visual studio code prompt from the start menu.
- Navigate to the folder where your app.py resides.
- Now run the program.
- It will show the local host where your app is running on <http://127.0.0.1:5000>
- Copy that localhost URL and open that URL in the browser. It does navigate me to where you can view your web page.

Then it will run on localhost:5000

The screenshot shows the Visual Studio Code interface. The Explorer panel on the left shows the project structure for 'FINAL DELIVERABLES' with a subfolder 'AI Based Discourse for Banking Industry' containing files like __pycache__, static, template, index.html, and app.py. The main editor displays the content of app.py, which is a Flask application. The terminal at the bottom shows the output of running the application, including a warning about development vs production servers and a list of HTTP requests being served.

```
File Edit Selection View Go Run Terminal Help
app.py - Final Deliverables - Visual Studio Code
